

Sondra Bernstein

Since late 2020, Sondra has returned to her passion of making art and re-discovering herself as a creator, collector and curator. As almost forty years have passed since art was her main focus, so many new tools have become available giving artists new ways to use their creativity and express themselves. Sondra has divided her time trying to learn as much as she can in these new practices and creating. Other than her photography; she has become a metaverse architect and builder for VOXELS, a digital artist publishing on the blockchain, an AI junkie and a founding member / curator for an international art collective called SearchLight.

Known in the NFT art community as 4everKurious she has been included in many exhibits both in galleries and metaverse spaces. Some of these are listed below.
